I graduated from Addis Ababa University, specifically Ababa Institute of Technology (AAIT), one of the most institutions in the country. AAIT is renowned for producing top- professionals and leaders who excel in various fields, both and internationally. My education here has equipped me with technical skills, a strong work ethic, and a deep commitment innovation and excellence. At AAIT, we are trained to difficult tasks and solve complex problems, which has prepared well for a career as a Full Stack Web Developer. I have the to build exceptional websites that not only look amazing but perform exceptionally well, delivering both aesthetics functionality seamlessly.

My Skills

Experienced with Front end Skills like

HTML

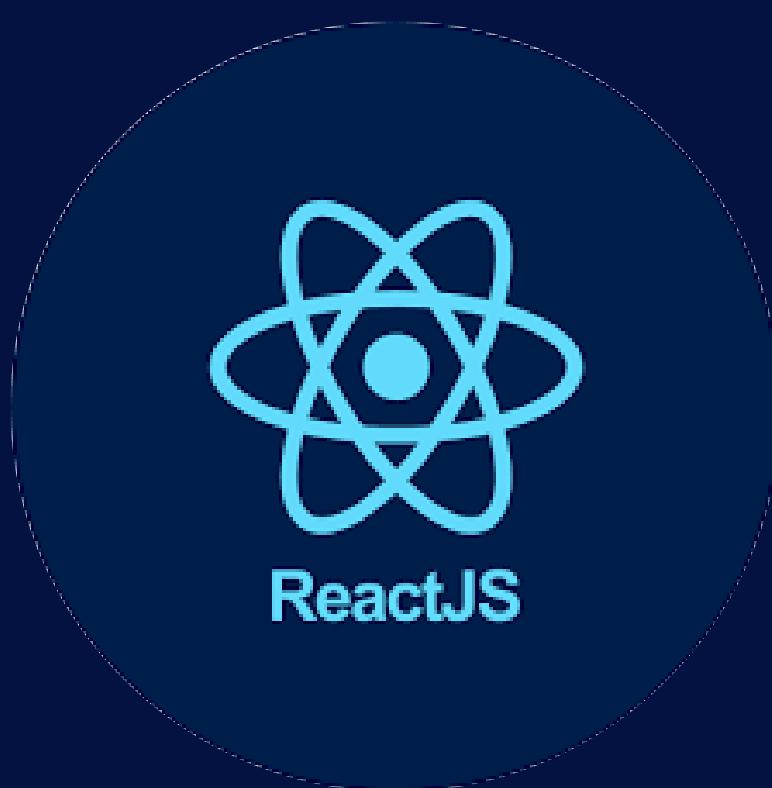

CSS

JS- Java Script

Bootstrap , Css frameWork

React, a JS frameWork

Back end Skills

I am a passionate and skilled Full Stack Web Developer with a strong foundation in creating visually stunning and high Performing websites. Having graduated from the prestigious AAIT at Addis Ababa University, I bring a commitment to excellence and a proven ability to handle complex challenges. Whether it's designing sleek front-end interfaces or building robust back-end systems, I ensure that every project is tailored to meet client needs. Let me help you turn your vision into a powerful digital presence with websites that are not only visually appealing but also optimized for seamless performance

Summary of Resume

Full Stack Web Developer with strong technical expertise in front-end and back-end technologies

Graduated from AAIT (Addis Ababa Institute of Technology), one of the top institutions in the country, with a solid foundation in software engineering.

Proven track record in developing dynamic, responsive, and high-performance websites.

Expertise in HTML, CSS, JavaScript, React, Node.js, and Databases (MySQL, MongoDB).

Passionate about problem-solving, innovation, and delivering high-quality solutions tailored to client needs.

Catagories	Skills
Front-End Development	HTML, CSS, JavaScript, React, Bootstrap
Back-End Development	Node.js, Express, MySQL, MongoDB
Version Control	Git, GitHub
Tools & Technologies	Visual Studio Code, Postman, Firebase
Database Management	MySQL, MongoDB, SQL Queries
Additional Skills	Problem Solving, Agile Methodologies, Web Optimization

Experience

- **Freelance Web Developer**

Designed and developed websites for various clients, ensuring responsive design and optimized performance.

- **Projects**

Built multiple full-stack applications, including a task management app, e-commerce platform, and product management software.

Hi I'm DAGIM

I am a passionate and skilled Full Stack Web Developer with a strong foundation in creating visually stunning and high Performing websites

[Hire me](#)

- Begin with a mobile-first approach, designing for the smallest screen and scaling up for larger devices.
- Use contrasting borders for input fields to clearly differentiate active from inactive states.
- Base all design choices on a logical rationale to ensure purpose-driven decisions.
- Highlight the importance of information using a clear visual hierarchy, with headings more prominent than paragraph text.
- Stick to familiar design patterns, like accordions, for improved user familiarity and ease of navigation.
- Remove unnecessary form fields to streamline the user experience and minimize interaction effort.
- Group related actions close together to make tasks quicker and more intuitive.
- Eliminate distractions by reducing unnecessary styles and elements.
- Use progressive disclosure to gradually reveal less critical information.
- Implement search suggestions to assist users in finding common terms faster.
- Ensure all critical information is visible and accessible at all times.
- Indicate button interaction states (e.g., hover, press, focus, disabled) for better user feedback.
- Use a 12-column grid to maintain layout consistency and balance.
- Space elements based on how closely they are logically related to improve usability.
- Follow a consistent design system with standardized layout, typography, color, and spacing.
- Maintain a line height of 1.5+ for body text to improve readability and user comfort.
- Limit user choices to speed up decision-making and simplify navigation.
- Use a type scale to define font sizes for a balanced and accessible design.
- Gradually enhance accessibility by meeting WCAG 2.1 level AA standards.
- Make headings more prominent by adjusting font size, weight, and contrast relative to body text.
